

November 17, 2022

The Holbrook Fire Dept. will be using the hydrant located near the old JFK School at 339 Plymouth St. between the hours of 10am – 12pm. The activity may cause discolored water in varying degrees in the local area. Persons who experience water discoloration should clear their water system by opening the cold-water faucet for several minutes and then wait about an hour. If the water still is not clear, they should repeat the flushing procedure.
